

HOSPITALITY ENERGY SOLUTIONS

BRAND GUIDELINES

OPTIMIZING EVERY WATT

Version 1.0 · 2026

The brand at a glance

Hospitality Energy Solutions helps hotels and hospitality venues cut energy waste and run smarter, cleaner buildings. Our identity is built around a single idea — continuous, self-renewing flow — expressed through an infinity mark that never stops moving.

This document defines how the brand looks and behaves: the logo system, colour, typography, iconography and the rules that keep every application consistent across print and digital.

The primary logo

The logo pairs the infinity mark with the wordmark set in a geometric sans. The mark symbolises perpetual optimisation; the gradient moves from deep forest green to a bright, active green — energy in motion.

HORIZONTAL LOCK-UP

Clear space & construction

Minimum clear space = height of the "H"

Always surround the logo with clear space equal to the cap-height of the H in HOSPITALITY. Keep this area free of text, imagery and competing graphics so the mark stays legible and uncrowded.

MINIMUM SIZE

35 mm / 132 px

Icon · 12 mm / 45 px

Logo variations

On white

On dark

One-colour black

One-colour white

Use the full-colour logo wherever possible. The one-colour black and white versions are reserved for single-colour print, engraving, faxes and any context where the gradient cannot reproduce.

Icon, monogram & badge

Infinity icon

Primary app / social avatar

HES monogram

Compact spaces

HES + infinity

Stacked short form

Circular badge

Incorrect usage

Don't stretch or distort

Don't recolour the mark

Don't add shadows or effects

Don't rotate

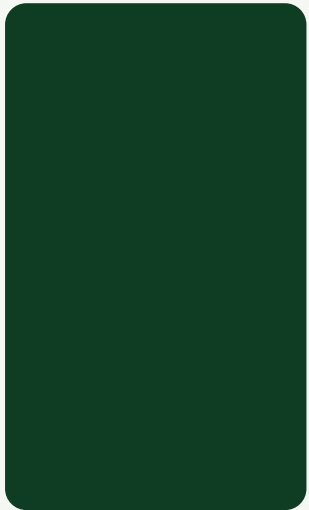

Don't alter the typography

Don't place on busy imagery

Colour palette

Primary Green

#0F3D23

RGB 15 61 35
CMYK 91 38 91 56

Secondary Green

#2E7032

RGB 46 125 50
CMYK 78 19 98 5

Accent Green

#7FBF3A

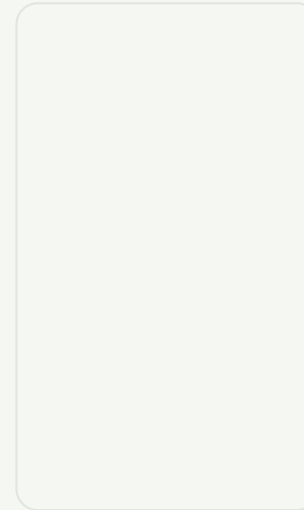

RGB 127 191 58
CMYK 55 0 97 0

Light Green

#B7E08A

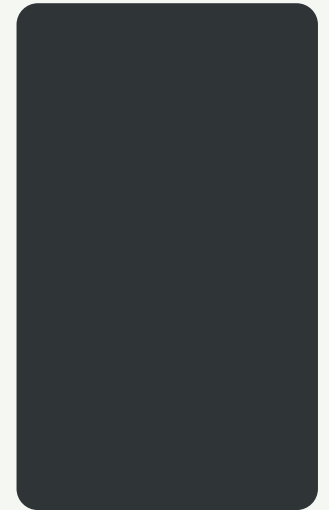

RGB 183 224 138
CMYK 31 0 57 0

Off White

#F5F7F2

RGB 245 247 242
CMYK 4 2 4 0

Dark Grey

#2F3437

RGB 47 52 55
CMYK 69 59 56 66

Primary and Secondary Green carry the brand across backgrounds and text. Accent Green energises calls-to-action and the logo gradient. Light Green supports patterns and highlights. Dark Grey is the default body-text colour; Off White is the preferred light background.

Typography

USAGE

Montserrat SemiBold

Headlines, the wordmark, section titles. Set tight to normal tracking.

Montserrat Medium

Sub-headings, labels, buttons and UI.

Inter Regular

Body copy, captions, long-form text — optimised for screen legibility.

Tracking

Wide-track uppercase (e.g. taglines) at +200 for an airy, premium feel.

Icon system

Analytics

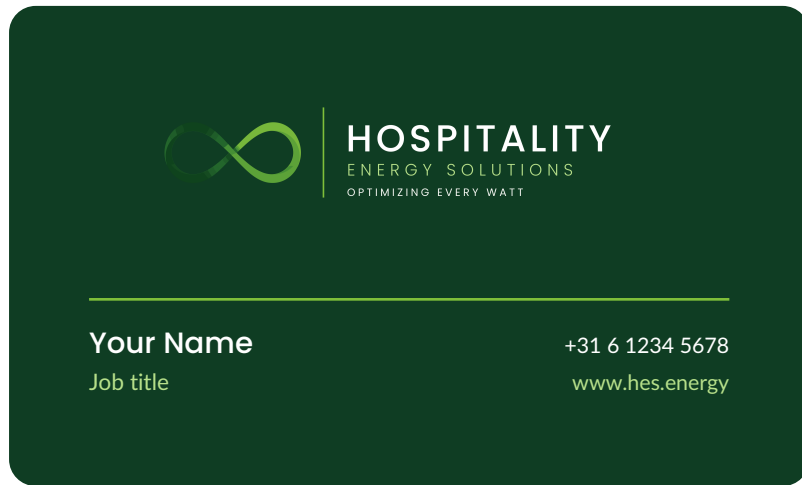

A consistent line-icon set — 2 px stroke, rounded joins, built on a 48 px grid. Icons use Secondary Green on light and Light Green on dark. Keep them simple and geometric to echo the infinity mark.

Brand pattern

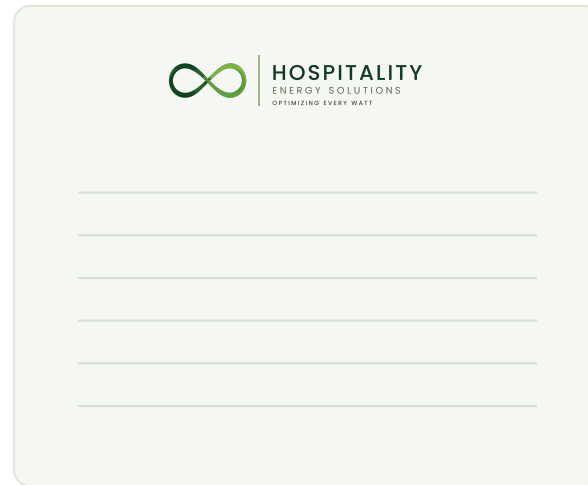

The signature wave pattern is derived from the flowing strands of the infinity mark. Use it as a subtle texture on covers, dividers and backgrounds — always low-contrast, never competing with content.

Applications

Business card

Letterhead

Email signature

Every touchpoint leads with the logo and the green system. Keep generous margins, use Off White or deep green backgrounds, and let the infinity mark anchor the composition.

Responsive logo system

Full stacked lock-up

Medium

Horizontal lock-up

Small

HES monogram

Icon

Infinity mark

Favicon

16–64 px

As space shrinks, the logo steps down gracefully — from the full stacked lock-up to the horizontal version, the monogram, the icon, and finally the favicon. Never force detail into a space too small to hold it.
